Principles of
Design

Critical Step in READING

Step 1

SCAN

The eye moves rapidly over the entire page; content is not as important as appearance

Step 2

SKIM

The contents of the document are being evaluated. Will I read this or not?

Step 3

SCOUR

Serious "READING" takes place

Your design will decide if a reader will scan the page or move on without reading it!

Principles of design demonstrate each in 5 x 7 composition

Balance
(symmetrical,
asymmetrical)

Movement

Contrast

Unity

Rhythm

Balance

Principle #1

Balance is achieved in a design when the “weight” of its elements seem evenly distributed. It can be formal or informal.

Formal (Symmetrical)

If you were to split the
“ad” down the middle it
would appear as if it
were almost mirror
image

Informal (non-symmetrical)

If you were to split the
“ad” down the middle it
would NOT be mirror
image

Proportion

Principle #2

Good PROPORTION is a visually pleasing relationship between elements used in a layout. The size of an element is normally based on its importance; the single, most important element is usually placed along the line of GOLDEN PROPORTION (of the visual centre, which is where the two lines intersect).

Golden Proportion

The VC
(visual
centre)

The design is more pleasing if the main element is placed slightly to the left and towards the top, that is, at the visual centre, rather than at the exact centre of the page

How to get the VC

The "Golden Proportion" formed the basis for many of man's creations. The rectangle is a basic form used in art, and the Greeks believed that the most "beautiful" rectangle must therefore utilize the ratio of length to width found in that proportion. Hence, the "Golden Rectangle" with length **one**, and width **.618** exists.

Draw a diagonal within the "Golden Rectangle." Note that the interior is divided into 2 congruent triangles, each with congruent corresponding angles. The ratio of the short side to the long side of each triangle is **.618** and the ratio of the long side to the short side is **1.618**. These numbers, pretty familiar by now, indicate that these triangles are beautiful by Greek standards.

Now construct a perpendicular from the far vertex to the diagonal. The interior is now divided into several triangles of different size, but note that each is similar to the other, indicating that their corresponding sides are proportional and their corresponding angles are congruent. In fact all of the triangles are "Golden Triangles."

Draw another perpendicular and more of these beautiful triangles are produced within the interior of the "Golden Rectangle."

Note the points of intersection within the rectangle's interior. Each point, called a "saddle point", indicates a position within the interior that is placed in a spot pleasing to the eye. It pleases us as viewers in an abstract sense because it forces us to recognize the "Golden Proportion" within the framework of the rectangle.

In fact there are 4 such "saddle points" available within the rectangle. Either one of these may be utilized as the location of the primary subject. Any secondary elements of the image should be placed at another saddle point or on a diagonal line that exists between saddle points.

The arrows indicate the BACKWARDS "s" we will talk about later on

Time to test your knowledge. Look on line at the www.htmacclennan.weebly.com site and locate the BMW ad below. Using software of your choice indicate what the “balance” is, and pinpoint the VC and saddle points.

Contrast

Principle #3

Contrast provides emphasis to important elements; it can be created using a variety of techniques: Typestyle (**bold** or *italics*), Type **SIZE**, **Colours**, rules, shading, or reverse lettering.

What is missing in terms of an element used in CONTRAST?

Remember that contrast need not include all techniques, but utilizes some.

Rhythm

Principle #4

The design should lead the eye along an invisible “road map”

The following demonstrates ways to create rhythm:

The use of WHITE SPACE draws the eye to the text at the bottom of the page

HOSTIX PLANET

HOSTIX PLANET

HOSTIX PLANET

The eye naturally follows the direction of a PERSON'S GAZE (the shape of a backwards "s")

» Bracing.

The tridion safety cell is additionally reinforced with high-strength steel sheets at strategically important points.

» Sandwich-type construction.

» Crash boxes.

» The wheel as a shock absorber.

A hard shell with a soft interior.

LINES are powerful tools to direct the eye

Unity

Principle #5

Unity in design is also called proximity. Unity provides cohesiveness to your designs. It is what pulls the elements together. Elements that are positioned close to one another are related while elements that are farther apart are less related.

All parts of the design must work together to communicate the message. Build the page around a dominant element, Group similar elements (grouping techniques include BOXES, WHITE SPACE, SCREEN, COLOUR

MIX OR MATCH...YOU CHOOSE!

DO YOU ONLY NEED TO UPGRADE YOUR TOWER???

INTEL CELERON, PENTIUM OR AMD PROCESSORS

HAVE A CHOICE OF UPGRADING TO THE BELOW SYSTEMS AT AFFORDABLE PRICES...AND STILL HAVE A FULL WARRANTY ON ALL YOUR HARDWARE!

CELERON ALL BLACK/SILVER TOWER ONLY

- INTEL CELERON 3.06 GHz PROCESSOR
- HUDSON 2 BAY DESKTOP CASE W/400W PSU (5 USB)
- FOXCONN SOCKET 775 MAINBOARD (LAN, VIDEO)
- SAMSUNG 18x DVD-RW DUAL LAYER/FORMAT BURNER
- 512 MB DDR2 667MHz RAM
- MULTIMEDIA KEYBOARD & OPTICAL MOUSE
- 56k MATCHING SPEAKERS
- 56k INTERNAL MODEM
- 80GB SATA2 7200 RPM HARD DISK DRIVE

COMPLETE WITH SYSTEM ASSEMBLY ONLY \$625.00*

PENTIUM ALL BLACK/SILVER TOWER ONLY

- INTEL PENTIUM 4, 3.0GHz PROCESSOR
- HUDSON 2 BAY DESKTOP CASE W/400W PSU
- FOXCONN SOCKET 775 MAINBOARD (LAN, VIDEO)
- SAMSUNG 18x DVD-RW DUAL LAYER/FORMAT BURNER
- 512 MB DDR2 667MHz RAM
- MULTIMEDIA KEYBOARD & OPTICAL MOUSE
- 56k INTERNAL MODEM
- 80GB SATA2 7200 RPM HARD DISK DRIVE

COMPLETE WITH SYSTEM ASSEMBLY ONLY \$875.00*

(System speaker will be black in colour)

COMPLETE

GLOBAL BRANDS

Techni-Service Australia
Newry Bay

FREE 30 Day USB Trial Drive with Each System!

ADD A 17" TFT FOR \$275 (one per system) - ADD A 19" WXGA WIDESCREEN TFT FOR \$350

RING FOR ADD-ONS: E.G. 3 YEAR ON-SITE WARRANTY - \$150, 6 WEEK SURGE-MODEM PROTECTION SYS. COMPLETE INTERNET SECURITY FROM \$60.00 AND ALL RECENT VERSIONS 2003-2007 MICROSOFT OFFICE. UPGRADE TO 250 GB SATA2 7200RPM HDD FOR ONLY \$60.00 MORE. UPGRADE TO 1GB DDR2 667 RAM FOR \$75.00 MORE.

STANDARD LABOUR CHARGES WILL BE APPLICABLE IF SYSTEM IS SET-UP OR FILES ARE TO BE TRANSFERRED/LOADED. THIS IS SOLD AS AN UPGRADE TO NEWER TECHNOLOGY ONLY.

SAM - 5PM M-F, OTHER BY APPOINTMENT

MADE DURING BUSINESS HOURS.

Flexirent
The way we do things differently

2% SURCHARGE ON CREDIT CARDS EFTPOS AVAILABLE

Too many shapes or type faces many cause a design to be unfocused. Use one shape and repeat. ** no more than THREE fonts on a page, one font family is best.

Okay?
Your turn

Your assignment:
